## Design Rationale

### Sustainable Growth

30% Treasury allocation ensures continuous funding for development and long-term expansion.

### Market Stability

30% combined (Liquidity + Presale) supports healthy market dynamics and accessibility for all.

### Incentive Alignment

Team tokens at 15% encourage long-term contribution without over-centralization. WAGMI.

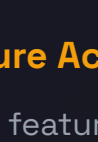

### Community-Driven

25% combined (Incentives + Marketing) ensures active participation and continuous user growth.

## TOKEN UTILITY

OVT powers the entire OpenVerse ecosystem

### Platform Transactions

Fees and payments within the OpenVerse ecosystem

### Feature Access

Unlock premium features and services

### Staking & Rewards

Earn yields by staking your OVT tokens

### Governance & Voting

Shape the future of OpenVerse with your voice

## OpenVerse Is Built Different

The OVT tokenomics model is well-balanced between growth, liquidity, incentives, and long-term sustainability. With a strong emphasis on ecosystem funding and community engagement, OVT is positioned to support both immediate adoption and future scalability.
